1. Project Title: 'Hirect India'

Platform Environment: HTML, CSS, Bootstrap, SaaS, Vue.JS, WordPress, GitLab, etc.

Domain: Recruitment Platform.

Description: -

Hirect is a leading job portal in India that streamlines the hiring process by directly connecting the job seeker to the hiring manager so they can chat instantly for free, unlike most traditional hiring processes, which are unreliable, long-winded and expensive.

Roles and Responsibilities:

- Develop the website and maintenance of the chat-based mobile-first App.
- To write reusable, testable and efficient code.

- Implementation of different modules as per the business requirements and preparing technical specifications documents for those functionalities.
- Actively worked with Senior Engineers to understand software requirements and timelines.
- Maintained comprehensive technical documentation such as programming specifications, functional and technical designs.
- Involved in fixing application to ensure timely delivery along with writing unit test cases.
- Involved in client interaction to sort out the requirement issues or needs any clarification of the same.

2. Project Title: Energy Management System (EMS)

Platform Environment: HTML, CSS, Bootstrap, JavaScript, GitHub, etc.

Description:

Energy management systems (EMS) are automation systems that collect energy measurement data from the field and making it available to users through graphics, online monitoring tools, and energy quality analyzers, thus enabling the management of energy resources.

Roles and responsibilities:

- worked on the front-end development.
- Performed assessment for application migration for latest tools and cloud deployment.
- Complete knowledge about basic, standardized towards all modules, and worked on all modules.
- Wrote technical documentation including low-level design, used cases and design documents.
- Worked within agile/scrum with various agile and scrum ceremony to deliver quality solutions on a predictable schedule.
